# Sub-SKU Forecasting

www.logility.com

## Apparel/Footwear As Catalyst

Forecasting Challenge at Granular Levels

Family/Style/Color/Gender/Size/Width

Manual Size Curve Creation

Disconnects with Sourcing/Manufacturing

More Integration Needed

Product Family															
Style A								Style B							
Color 1				Color 2				Color 3				Color 1			
S	M	L	X	S	M	L	X	S	M	L	X	S	M	L	X

# Sub-SKU Forecasting

[www.logility.com](http://www.logility.com)

## Proportional Profiles Planning

Integrated sub-SKU planning

Extended Forecasting Hierarchy

Profiles From Sales History

Attribute Based

Beyond Apparel/Footwear

Fans: Finish/Color/Speed/Blade Length/ Lighting Kit

# Sales & Operations Planning

[www.logility.com](http://www.logility.com)

Around for 30 years—now really taking hold

Stages of Maturity

Executive S&OP

# The Journey for Demand-Driven S&OP

www.logility.com

## Maturity Stages of S&OP Create a Divergence of Solutions

	Stage 1 Reacting	Stage 2 Anticipating	Stage 3 Collaborating	Stage 4 Orchestrating
Balance: S&OP				
Goal	Development of an operational plan	Demand and supply matching	Profitability	Demand sensing and conscious trade-offs for demand shaping to drive an optimized demand response
Ownership	S = Sales OP = Factory capabilities	S = Sales and marketing plans OP = Planning and factory capabilities	S = Go-to-market plans OP = Design of demand-driven plan; make and deliver processes	S = Go-to-market strategies and solutions OP = Translation of demand into plan; make, deliver, source and service strategies, with connection to execution
Metrics	Order fill rate, asset utilization, inventory levels	Order fill rate, forecast error, inventory turns, functional costs	Demand error, customer service, working capital, total costs	Demand risk, customer service, cash flow, market share, profit

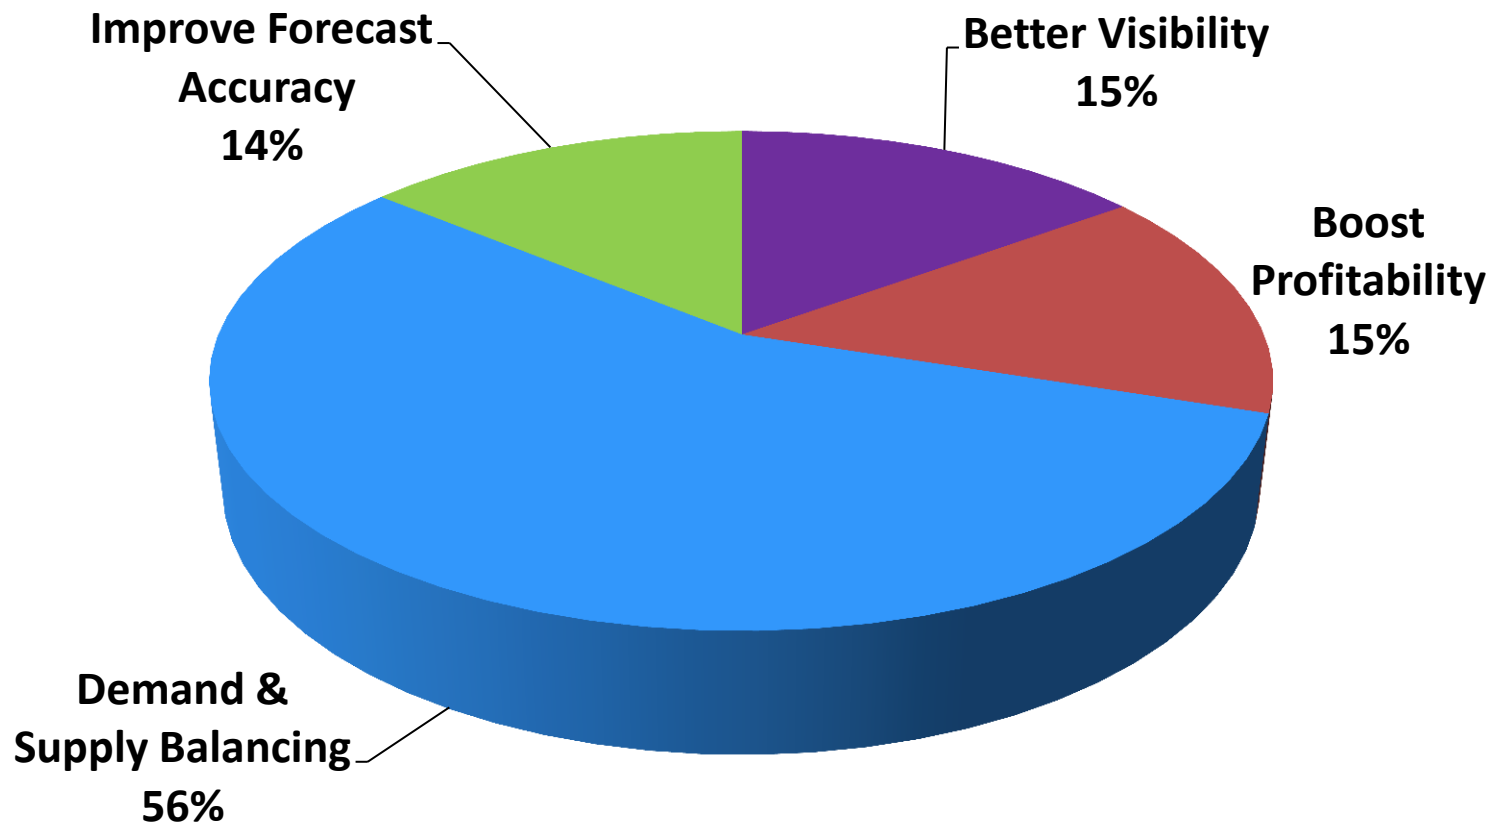

Increase in Organizational Balance

Many Different Definitions

Cost versus Service Dynamic

Using Inventory More Strategically

Including Inventory in SLOP Process

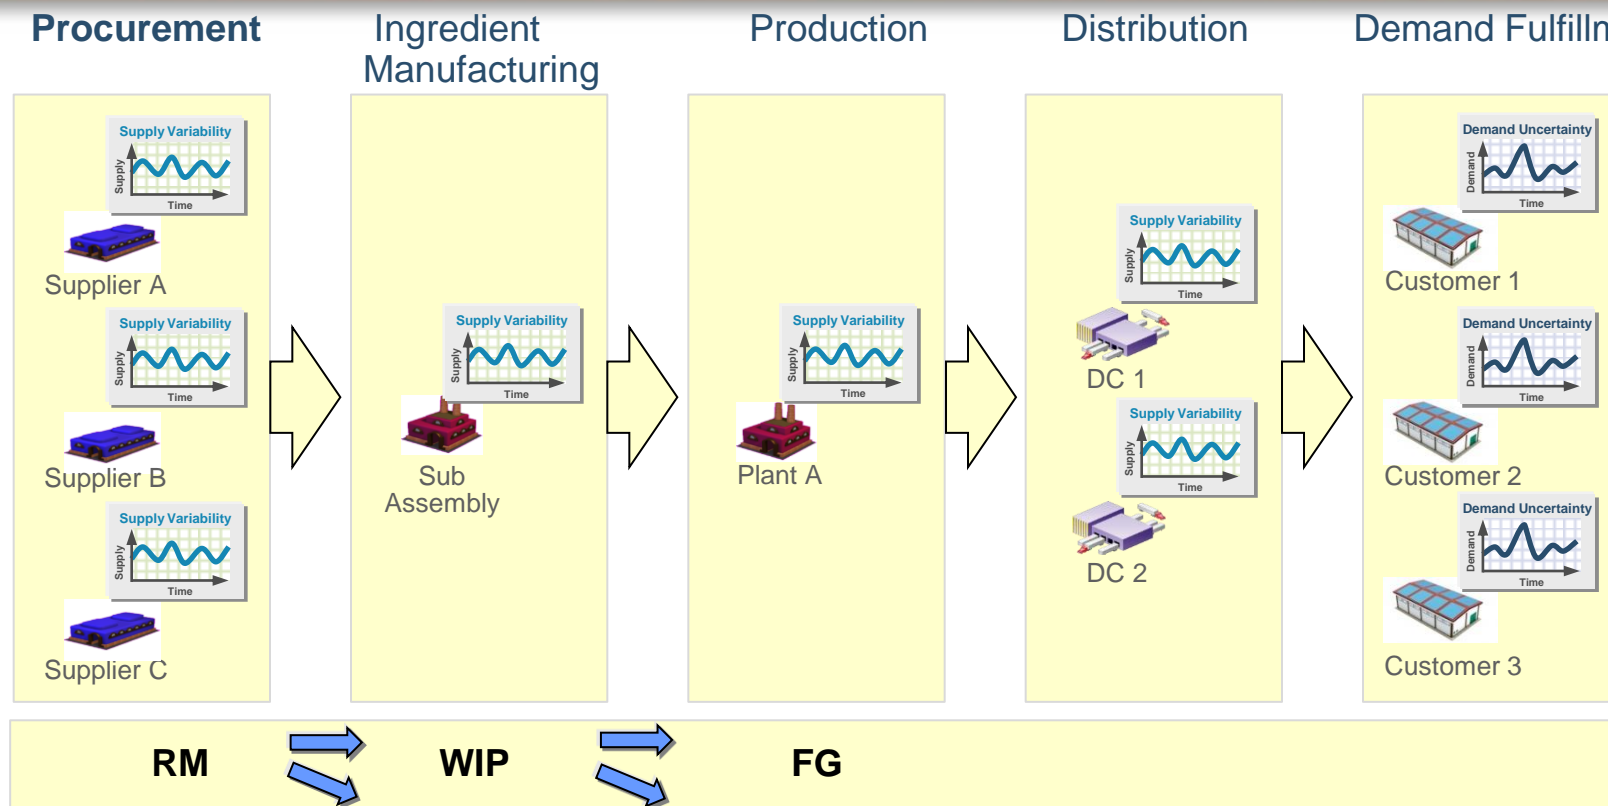

The Impact of Multi-Echelon

# Challenges that make inventory optimization difficult

www.logility.com

- Unsynchronized safety stock targets lead to:
  - Excess inventories of incorrect products in incorrect locations;
  - Frequent expedites
  - Results that are locally optimal, not globally optimal

# Multi-Echelon Inventory Optimization

www.logility.com

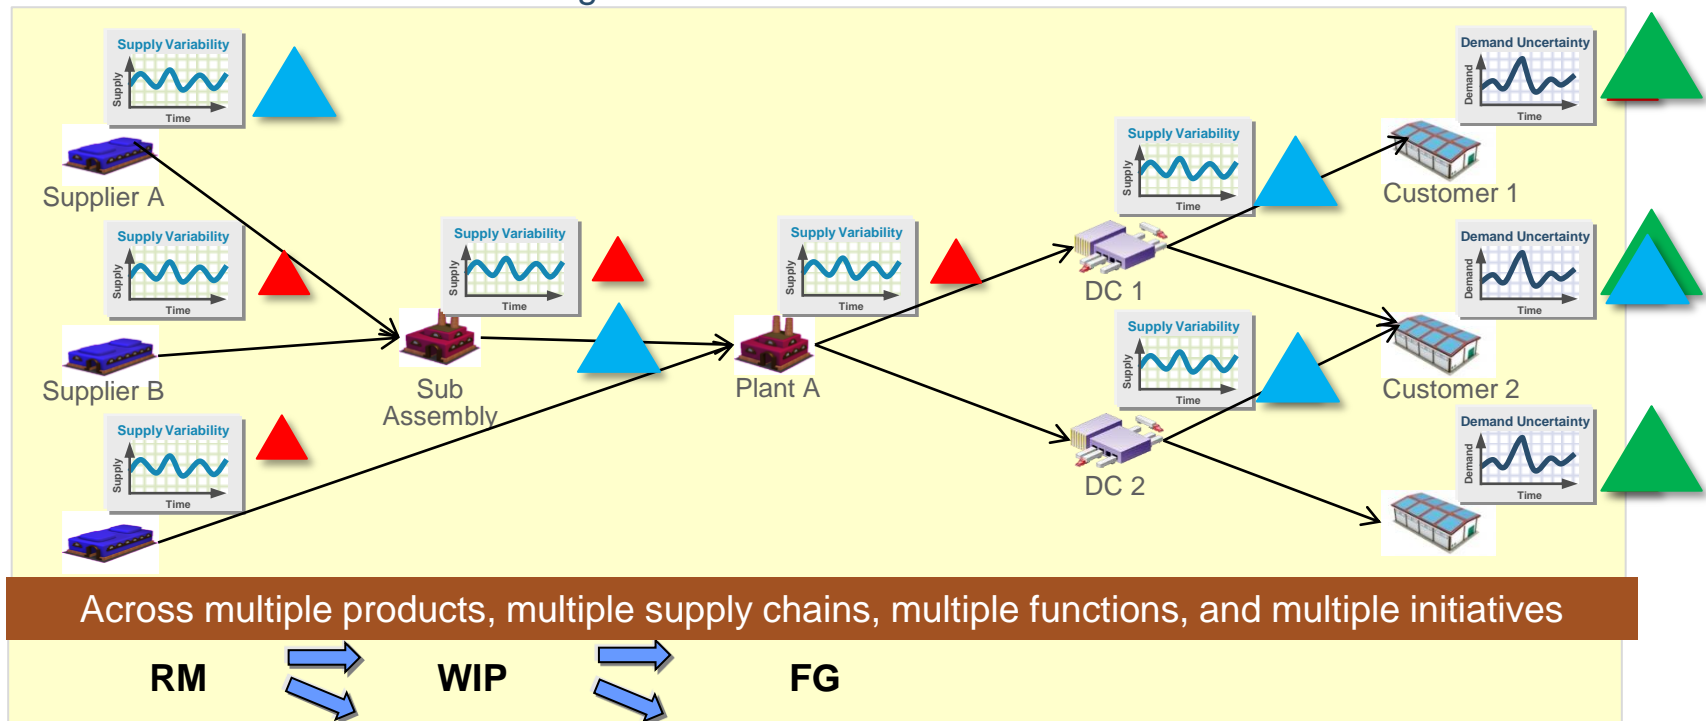

Procurement

Ingredient  
Manufacturing

Production

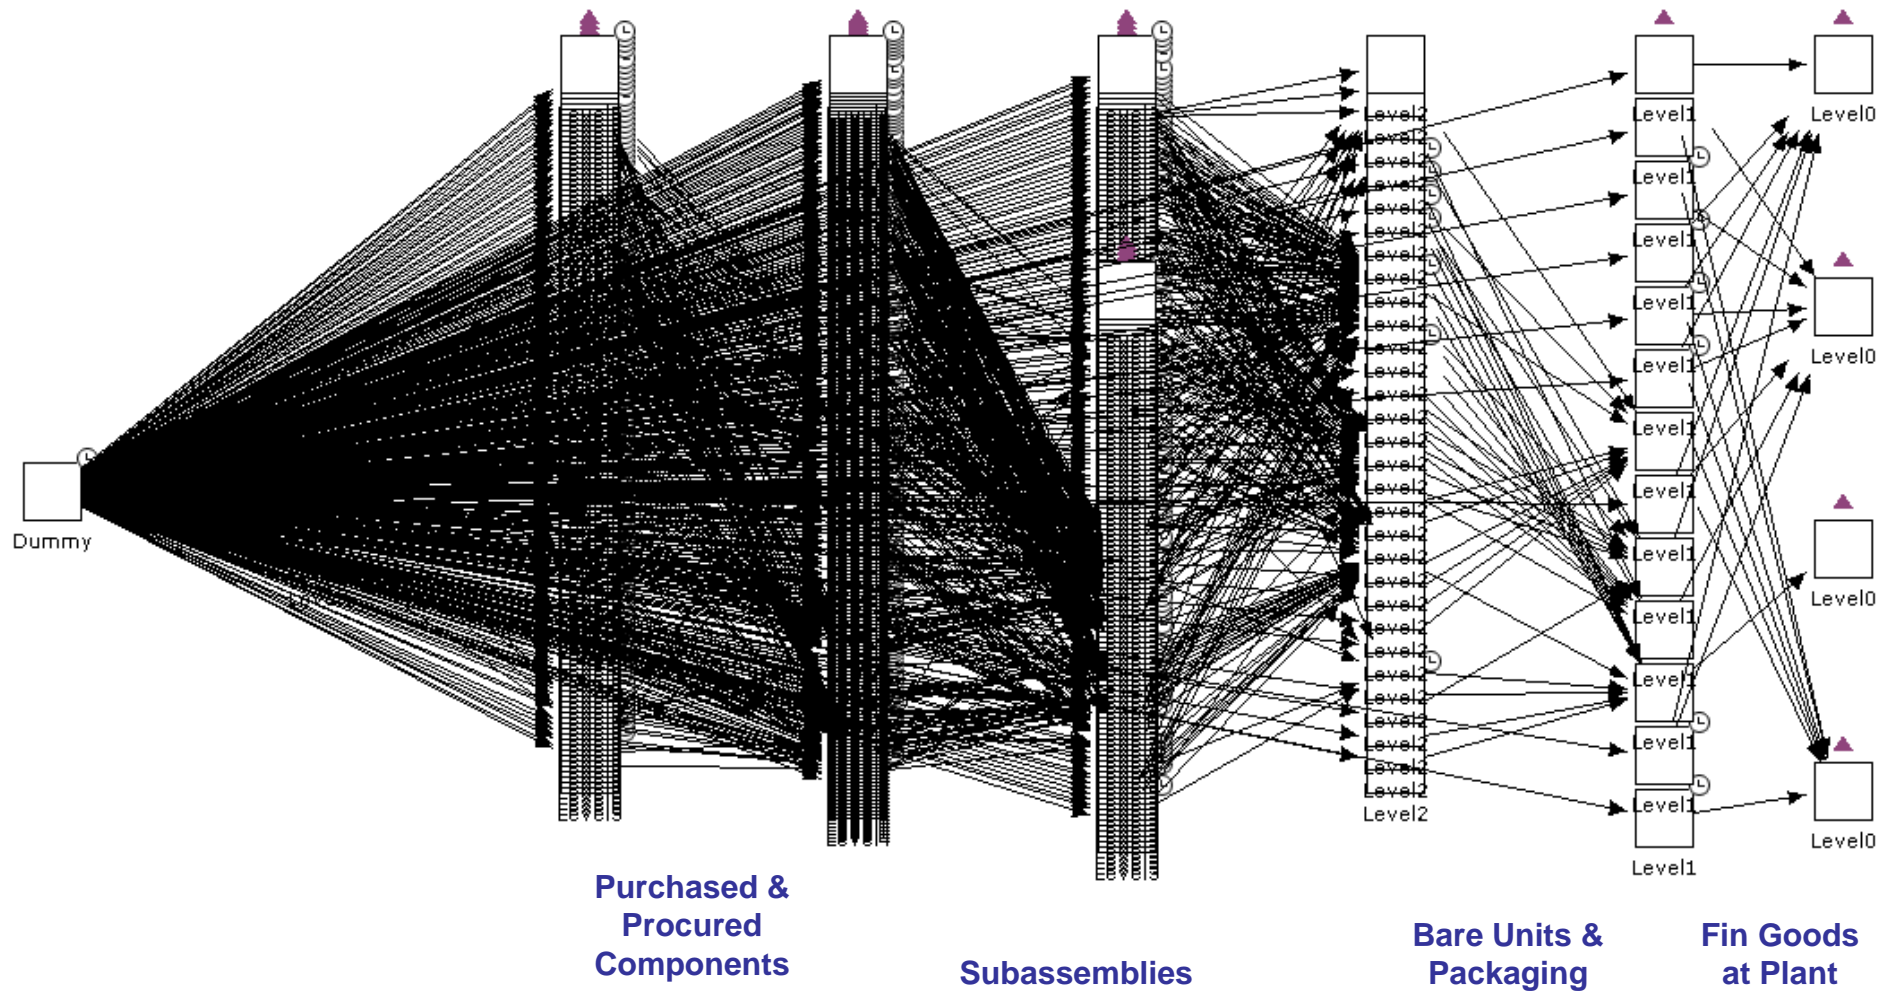

Distribution

Demand Fulfillment

- Synchronized inventory policies across the supply chain
- Ensures the right inventory across the supply chain to satisfy service level goals
- Provides a what-if environment

# Chain Model: Four Sample Tools

*Even a simple example is just too complex for an Excel formula to solve*

**StanleyBlack&Decker**

CDIY- Inventory Optimization

# Major Trends We See

[www.logility.com](http://www.logility.com)

1. Exception Based Planning
2. Planning the Extended Supply Chain
3. Sub-SKU-based forecasting
4. Sales and Operations Planning
5. Inventory Optimization

# Thank You
